

School Malaise Trap Program

Individual Trap Report: Alliance St-Joseph Trap # EQP-CLL-505

Your classroom made an important contribution to the spring 2014 [School Malaise Trap Program](#) and helped to make it a huge success. Your trap collected a total of 12 specimens in week 1 and 37 specimens in week 2. Summed across the two weeks, your sample ranked 54 out of 58 for the total number of specimens collected. Within your sample, there were 33 species, which ranks your sample 44 out of 58 for species diversity. The species you collected came from several different groups (see pie chart below) and 10 species were *only* collected in your trap. Your class should be pleased to have made this contribution to the [International Barcode of Life](#) project, the largest endeavour in biodiversity science.
