

Individual Trap Report:

David Suzuki Secondary School

Trap # EQP-CLL-517

Your classroom made an important contribution to the spring 2014 [School Malaise Trap Program](#) and helped to make it a huge success. Your trap collected a total of 21 specimens in week 1 and 8 specimens in week 2. Summed across the two weeks, your sample ranked 57 out of 58 for the total number of specimens collected. Within your sample, there were 9 species, which ranks your sample 58 out of 58 for species diversity. The species you collected came from several different groups (see pie chart below) and 2 species were *only* collected in your trap. Your class should be pleased to have made this contribution to the [International Barcode of Life](#) project, the largest endeavour in biodiversity science.
