

Individual Trap Report:
St. Thomas Aquinas Catholic
Secondary School
Trap # EQP-CLL-495

Your classroom made an important contribution to the [School Malaise Trap Program](#) and helped to make it a huge success. Your trap collected a total of 58 specimens in week 1 and 258 specimens in week 2. Summed across the two weeks, your sample ranked 73 out of 81 for the total number of specimens collected. Within your sample, there were 71 species, which ranks your sample 62 out of 81 for species diversity. The species you collected came from several different groups (see pie chart below) and included 4 *new* species to our DNA barcode library and 5 species were *only* collected in your trap. Your class should be pleased to have made this contribution to the [International Barcode of Life](#) project, the largest endeavour in biodiversity science.
