

Individual Trap Report: Grand River Collegiate Institute Trap # EQP-CLL-503

Your classroom made an important contribution to the [School Malaise Trap Program](#) and helped to make it a huge success. Your trap collected a total of 303 specimens in week 1 and 156 specimens in week 2. Summed across the two weeks, your sample ranked 65 out of 81 for the total number of specimens collected. Within your sample, there were 86 species, which ranks your sample 35 out of 81 for species diversity. The species you collected came from several different groups (see pie chart below) and included 8 *new* species to our DNA barcode library and 4 species were *only* collected in your trap. Your class should be pleased to have made this contribution to the [International Barcode of Life](#) project, the largest endeavour in biodiversity science.
