

School Malaise Trap Program

Individual Trap Report: Monsignor Paul Dwyer Catholic High School Trap # EQP-CLL-585

Your classroom made an important contribution to the [School Malaise Trap Program](#) and helped to make it a huge success. Your trap collected a total of 283 specimens in week 1 and 450 specimens in week 2. Summed across the two weeks, your sample ranked 35 out of 81 for the total number of specimens collected. Within your sample, there were 99 species, which ranks your sample 16 out of 81 for species diversity. The species you collected came from several different groups (see pie chart below) and included 11 *new* species to our DNA barcode library and 16 species were *only* collected in your trap. Your class should be pleased to have made this contribution to the [International Barcode of Life](#) project, the largest endeavour in biodiversity science.
