

# Individual Trap Report: Kelowna Christian School Trap # EQP-CLL-554

Your classroom made an important contribution to the Fall 2014 [School Malaise Trap Program](#) and helped to make it a huge success. Your trap collected a total of 1575 specimens in week 1 and 684 specimens in week 2. Summed across the two weeks, your sample ranked 5 out of 59 for the total number of specimens collected. Within your sample, there were 169 species, which ranks your sample 7 out of 59 for species diversity. The species you collected came from several different groups (see pie chart below) and 72 species were *only* collected in your trap. Your class should be pleased to have made this contribution to the [International Barcode of Life](#) project, the largest endeavour in biodiversity science.
