

# Individual Trap Report:

Lincoln M. Alexander Secondary School  
Trap # EQP-CLL-629

Your classroom made an important contribution to the spring 2014 [School Malaise Trap Program](#) and helped to make it a huge success. Your trap collected a total of 59 specimens in week 1 and 217 specimens in week 2. Summed across the two weeks, your sample ranked 35 out of 58 for the total number of specimens collected. Within your sample, there were 70 species, which ranks your sample 7 out of 58 for species diversity. The species you collected came from several different groups (see pie chart below) and 12 species were *only* collected in your trap. Your class should be pleased to have made this contribution to the [International Barcode of Life](#) project, the largest endeavour in biodiversity science.
