

Individual Trap Report: Lively District Secondary School Trap # EQP-CLL-549

Your classroom made an important contribution to the Fall 2014 [School Malaise Trap Program](#) and helped to make it a huge success. Your trap collected a total of 205 specimens in week 1 and 206 specimens in week 2. Summed across the two weeks, your sample ranked 40 out of 59 for the total number of specimens collected. Within your sample, there were 132 species, which ranks your sample 36 out of 59 for species diversity. The species you collected came from several different groups (see pie chart below) and 45 species were *only* collected in your trap. Your class should be pleased to have made this contribution to the [International Barcode of Life](#) project, the largest endeavour in biodiversity science.
