

Individual Trap Report: St. Stephen Elementary Catholic School Trap # EQP-CLL-597

Your classroom made an important contribution to the spring 2014 [School Malaise Trap Program](#) and helped to make it a huge success. Your trap collected a total of 326 specimens in week 1 and 231 specimens in week 2. Summed across the two weeks, your sample ranked 19 out of 58 for the total number of specimens collected. Within your sample, there were 59 species, which ranks your sample 18 out of 58 for species diversity. The species you collected came from several different groups (see pie chart below) and 2 species were *only* collected in your trap. Your class should be pleased to have made this contribution to the [International Barcode of Life](#) project, the largest endeavour in biodiversity science.
