

School Malaise Trap Program

Individual Trap Report: Assiginack P.S. Trap # EQP-CLL-496

Your classroom made an important contribution to the Fall 2015 [School Malaise Trap Program](#) and helped to make it a huge success. Your trap collected a total of 521 specimens in week 1 and 204 specimens in week 2. Summed across the two weeks, your sample ranked 20 out of 64 for the total number of specimens collected. Within your sample, there were 150 species, which ranks your sample 8 out of 64 for species diversity. The species you collected came from several different groups (see pie chart below) and 32 species were *only* collected in your trap. Your class should be pleased to have made this contribution to the [International Barcode of Life](#) project, the largest endeavour in biodiversity science.
