

School Malaise Trap Program

Individual Trap Report: Preeceville School Trap # EQP-CLL-911

Your classroom made an important contribution to the Fall 2015 [School Malaise Trap Program](#) and helped to make it a huge success. Your trap collected a total of 828 specimens in week 1 and 1685 specimens in week 2. Summed across the two weeks, your sample ranked 4 out of 64 for the total number of specimens collected. Within your sample, there were 162 species, which ranks your sample 3 out of 64 for species diversity. The species you collected came from several different groups (see pie chart below) and 47 species were *only* collected in your trap. Your class should be pleased to have made this contribution to the [International Barcode of Life](#) project, the largest endeavour in biodiversity science.
