

Individual Trap Report:

Swansea Public School
Trap # EQP-CLL-498

Your classroom made an important contribution to the Fall 2015 [School Malaise Trap Program](#) and helped to make it a huge success. Your trap collected a total of 158 specimens in week 1 and 380 specimens in week 2. Summed across the two weeks, your sample ranked 32 out of 64 for the total number of specimens collected. Within your sample, there were 48 species, which ranks your sample 40 out of 64 for species diversity. The species you collected came from several different groups (see pie chart below) and 12 species were *only* collected in your trap. Your class should be pleased to have made this contribution to the [International Barcode of Life](#) project, the largest endeavour in biodiversity science.
