

Individual Trap Report: Davenport Public School Trap # EQP-CLL-559

Your classroom made an important contribution to the Fall 2016 [School Malaise Trap Program](#) and helped to make it a huge success. Your trap collected a total of 696 specimens in week 1 and 309 specimens in week 2. Summed across the two weeks, your sample ranked 18 out of 67 for the total number of specimens collected. Within your sample, there were 120 species, which ranks your sample 12 out of 67 for species diversity. The species you collected came from several different groups (see pie chart below) and 37 species were *only* collected in your trap. Your class should be pleased to have made this contribution to the [International Barcode of Life](#) project, the largest endeavour in biodiversity science.
